Changing of the Journal Format

We are pleased to inform readers and authors that the journal has changed its format after a recent change of the journal title from 'J Thai Rehabil Med' to 'ASEAN J Rehabil Med' early this year. We aim at publishing all articles in English in 2020. And the Thai manuscripts will be accepted only in this year publication. Later, we will ask authors to translate their manuscripts into English.

In this issue, all original articles written in English will have only an English abstract, no additional Thai abstract as usual. And two Thai articles have both English and Thai abstracts; and all tables, figures and references are in English.

In addition, we are pleased that one original article published in this issue is from Indonesia. We do hope that in the future, there will be more and more original articles from other countries in Southeast Asia (SEA) countries. This will lead to exchanging knowledge from researches in the field of rehabilitation medicine in the region.

Apart from being a print journal, the journal recently received an e-ISSN which means that the journal is also an online journal and readers can easily access to all articles published in the journal via the website, <https://www.tci-thaijo.org/index.php/aseanjrm/issue/archive>.

We do hope that the ASEAN Journal of Rehabilitation Medicine shall be widely accepted by not only rehabilitation physicians (physiatrists) but also other rehabilitation professionals of ASEAN.

Apichana Kovindha, MD, FRCPhysiatr
